

*SCHOOL STREET DEPOSITION  
AREAS REVEGETATION*

*Cohoes, New York*

CLA SITE coordinated with Brookfield Power, the landscape installation company and the U.S. Army Corps of Engineers to create a revegetation plan and a management and monitoring plan for 2.2 acres of freshly deposited dredge material. The action of dredging and the creation of the deposition areas created a challenge for plant establishment.

Planting specifications were developed to adhere to the USACOE permit for the dredging project which required rapid vegetation establishment across the deposition areas.

Services included analysis of existing vegetation, planting plan design, plant procurement, planting specifications, management of plant installation and a USACOE compliant management and monitoring plan.
