

SENSORY TRAIL

*Northumberland, New York
2013*

CLA SITE provided Site Reconnaissance, Alternative Schematics, Public Information Meetings, Construction Requirement Analysis, SEQRA, Draft and Final Construction Documents and Construction Administration for this 1/4 mile, handicap accessible, sensory trail along the south shore of Lock 5 Island.

This trail is notable in that it is one of only a handful of handicap accessible trails in the US dedicated to people who are visually impaired.

On June 15, 2013, the Riverwalk Sensory Trail officially opened.
