

CAMP WILDWOOD FACILITY IMPROVEMENTS  
Altamont, New York  
2013-Present

CLA SITE has been providing Landscape Architecture and Engineering services for Wildwood Programs in Altamont, NY since 2013. Professional services have included the redevelopment of an existing summer camp to provide Camp Wildwood with improved facilities and parking upgrades.

The Camp is run solely for clients with developmental and special needs. This allows for students who strongly benefit from year-round educational services to be able to receive these services in an alternate, camp-like, outdoor environment. Facility improvements included re-grading a paved parking and drop-off area, stormwater improvements and grading for future maintenance, administration and nursing buildings.
