

*GREEN ISLAND MUNICIPAL CENTER
AND RIVERWALK*

*Green Island, New York
2008*

In conjunction with Green Island Power Authority, CLA SITE provided Visual Impact Assessments and Site Planning and Design services for the development of a Hydroelectric Plant Expansion and Riverfront Park and Municipal Center.

Features included a continuous boardwalk, sidewalks and public promenade along an upper terrace extending to River Park. Additional river access improvements will provide ADA-compliant ramps, stairs, viewing terraces and fishing platforms allowing universal access. Improvements also included period lighting, landscaping, park amenities and interpretive signage.

CLA SITE proposed locations for the development of a Municipal Center, Public Safety Facility, public parking and future redevelopment areas at the Ford site.
