

CHAMPLAIN CANALWAY
TRAIL SEGMENT 2

Halfmoon, New York

CLA SITE is currently preparing a detailed site feasibility study of potential trail routes along a section of the canalway trail between Upper Newton Road and Route 4 / Route 146, providing a safe connection from the existing Upper Newton Road Trailhead to the Town of Mechanicville. Three alternatives are being evaluated as part of our work.

Project components include detailed site analysis, identification of environmental issues, conceptual plans and illustrations, cost estimates, and public participation workshops.
